

1.5 inch Mini Prism
M-1500
series

DEBUT

M-1500GP / M-1500MP

Large Fixation Knob

Short Range Surveying

Prism Constant 0mm

Maintenance

Adjustable Prism Height

Wide Elevation Angle

Go forward

Myzox Mini Prism has kept on evolving on each updates.
Our previous model was most popular mini prism in Myzox.
M-1500 series take over the design and add the extra functions for more convenience to users.

Wider Elevation Angle

Maximum elevation angle is 38 degree.
 It is 5 degree than conventional products.
 This change will bring an accurate surveying at closer range.

Name Printing

The product with initial specifications show our brand and model name.
 Those signs are made of sticker, and we can change to your favorite words.

Maintenance Performance

The soft patch on inside lock part which contacts with the pole is more subject to become worn.
 To maintain more easily, we have changed to the independent structure.

Knob & Circular Level

To handle easily, we changed to the width of a fixation knob with fine slits.
 The bottom color of circular level is changed to silver. Silver color help to increase the visibility.
