Myzox's Tripods

What is the Best Tripod?

Most people may think measuring accuracy is brought by an instrument accuracy and a surveyor's skill. It's generally true, but there is one more important factor, which is accessories such as tripods, prisms or leveling staves.

Myzox's tripods are developed with every situation in mind. Wooden Tripod is heavy but absorbs the vibration from ground, and thermal expansion rate is low. When you need a precision surveying, the wooden tripod works well. Thermal expansion rate of aluminium Tripod is higher than wooden one. But it's light weight to carry around. It's suitable for surveying with auto levels.

Wooden Tripod

Aluminium Tripod

International Standard

Surveying tripod requirements are defined by the International Standard (ISO 12858-2) in terms of height stability under load and torsional rigidity. In addition to these requirements, Myzox also evaluates the paint adhesion, salt resistance and the horizontal drift. These properties were tested on a range of tripods. Myzox tripods pass these series of stringent tests and ensure precision and stable measurements.

Time to Get New Tripod

Damages of tripod may effect the accuracy of measuring. Please check the timing to get new tripod.

Urgency of replacement

High	High Urgency
	Dent or Scratch on Tripod Head The bubble moving after tightening screw may be caused by dents or scratches.
	Middle Urgency
Low	Damage of Tripod Leg The damage of tripod leg may not cause measuring error soon. But the instrument may fall down by the damage getting worse.
	Low Urgency
Low	Abration of Fixing Screw or Shoe Tip It's replaceable parts.

VARIOUS WOODEN TRIPODS

Myzox has various types of Wooden Tripod. Choosing the proper tripod based on working conditions brings saving your power, time and money. A top surveyor care about invisible value. The most important thing in wooden tripod is not visible value like price. PMW series supply the following invisible value.

- High stability as base of instruments
- High torsional rigidity
- Low expansion

Elevating Tripod

NEL series

SMOOTH ELEVATING

NEL series has smooth elevating systems with 2 types (Dustproof Type, Graduated Type).

► FEATURES

Tripod head cover

Safety chain

Wide space

Adjustable level

Black alumite

Graduation (NEL-60SL)

NEL-33SL

NEL-60SL

✓ CHECK

SMOOTH ELEVATING

NEL series has smooth elevating system. Smooth elevating enables to set lasers up with ideal height easily.

DUST-PROOF & GRADUATED

Dust-proof type keeps smooth elevating by preventing the inflow of sand. Graduated type brings easy setting with graduation on the pole.

Prism Pole Tripod

PPS series

ADJUST EASILY

PPS series has different types of clamp, which make easier to adjust pole for setting.

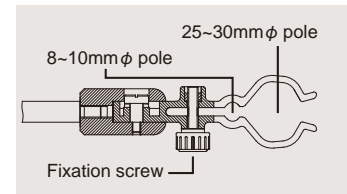

► 360° ROTATING GRIP (CPPS , PPS , MPPS2)

► SLIDABLE ARM (MPPS2)

► FLEXIBLE SYSTEM (FPPS2)

✓ CHECK

ADJUST EASILY

The most important point of prism pole tripod is easy to set up prism poles. At the point of setting up prism poles, it is necessary to adjust circular level by adjusting prism poles and prism pole tripod.

PPS series has 360° rotating clamp or flexible clamp. Both of clamp systems bring efficient works for users.

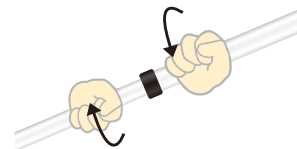

✓ CHECK

TWIST LOCK

To extend or close the legs, it is just twist. The reason we use this locking is for efficiency.

Comparing with screw lock, the withstand load may not be high. But the loading from the above is not big, this locking system is enough to support the pole.

► SPECIFICATIONS

Model	CPPS	PPS	MPPS2	FPPS2
Full extended	600mm	1,194mm	854mm	1,228mm
Full closed	459mm	756mm	601mm	790mm
